Name: Rajendra Kumar

Roll No: B24BS2273

Course: Foundations of AI

Project: Multi-Step Decision Assistant for Career Planning

📌 Project Title:

Multi-Step Decision Assistant for Career Planning

📌 Description:

**This project is an AI-powered assistant built using Flowise and OpenRouter.
It collects user inputs step-by-step (goal, interest, level, time, budget) and generates personalized career recommendations, course suggestions, and a structured learning roadmap using LLM reasoning.**

📌 Features:

- **Multi-step conversation flow**
- **Option-based input system**
- **AI-powered recommendations**
- **Structured output (career path, courses, roadmap, daily plan)**
- **Personalized reasoning**

📌 Tools & Technologies Used:

- Flowise (Visual AI builder)
- OpenRouter API
- LLM (GPT-3.5 / Mixtral)

📌 Flow Design:

Goal → Interest → Level → Time → Budget → AI Output

📌 Working:

The assistant asks questions one-by-one and collects user responses.
After gathering all inputs, it generates a complete career plan including courses, roadmap, and daily schedule.

📌 Output:

- Career Path
- Top Courses
- Learning Roadmap
- Daily Plan
- Reasoning

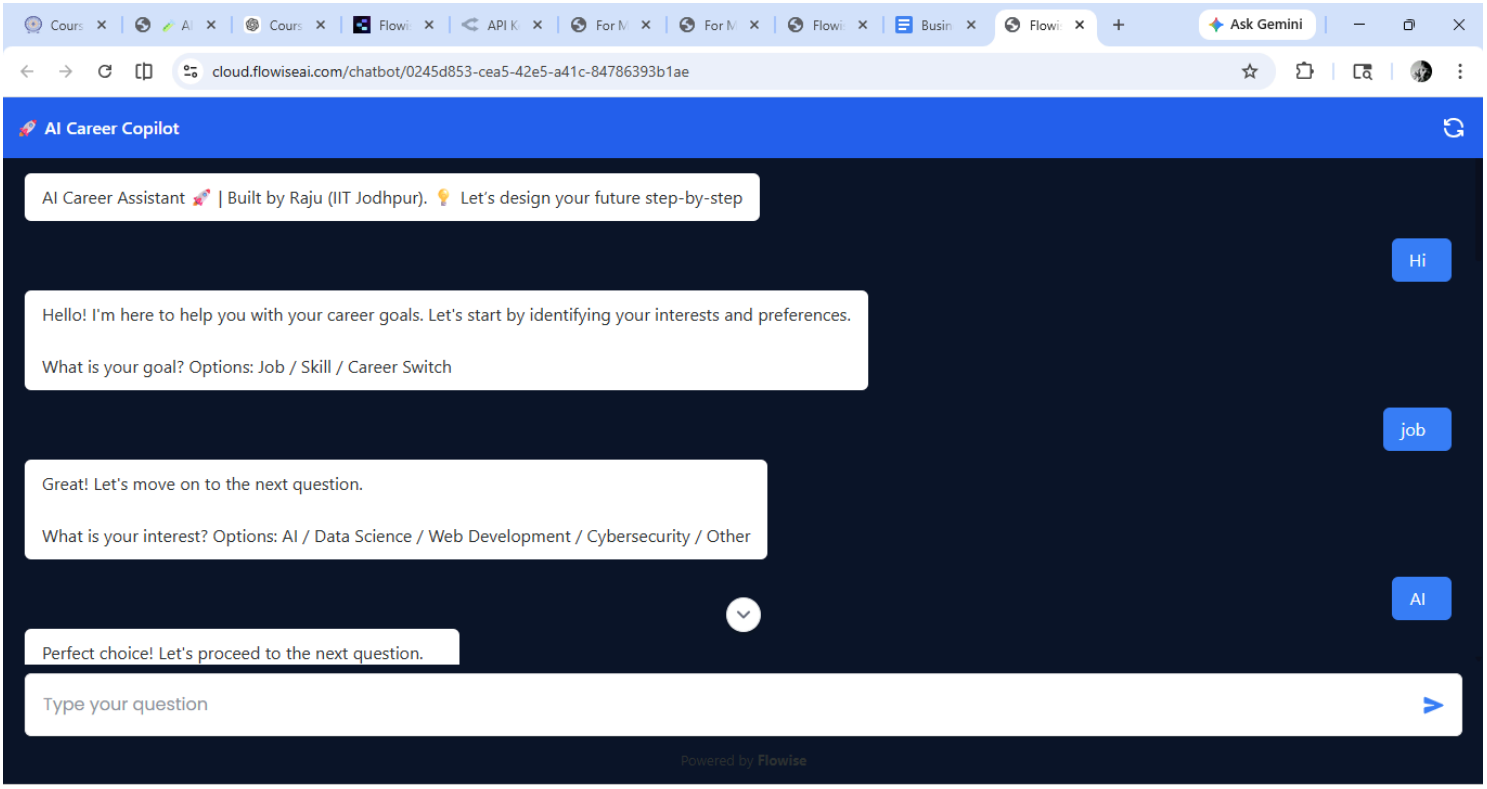
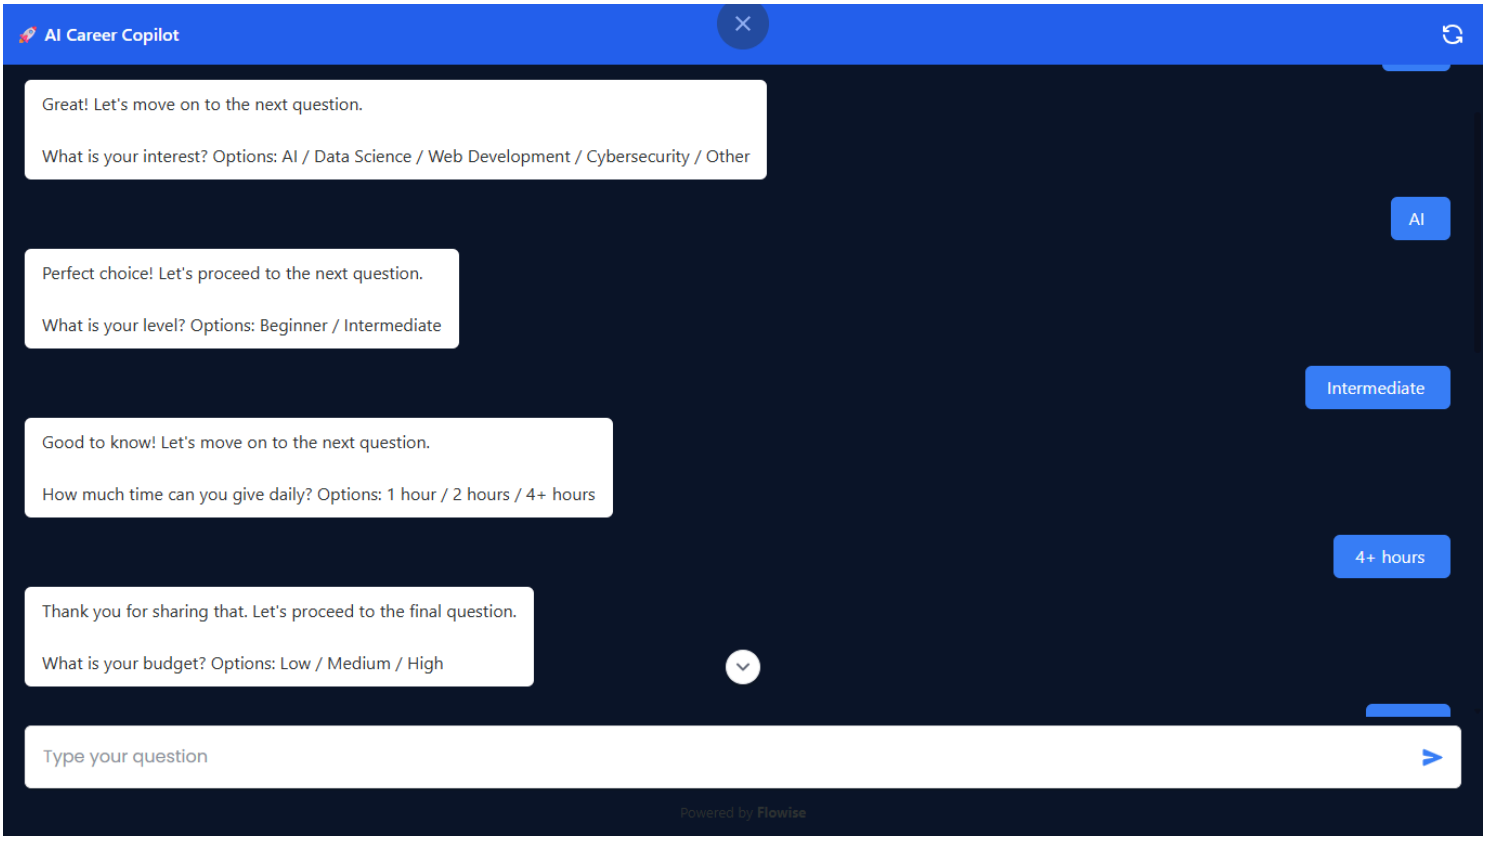
🔍 Output(Testing)





🚀 AI Career Copilot

Thank you for sharing that. Let's proceed to the final question.

What is your budget? Options: Low / Medium / High

High

Thank you for providing all the necessary information. Let me generate a personalized career path for you based on your responses.

=== Career Path === AI Engineer

=== Top 3 Courses ===

1. Course 1: Deep Learning Specialization by Andrew Ng on Coursera
2. Course 2: Natural Language Processing Specialization by National Research University Higher School of Economics on Coursera
3. Course 3: Reinforcement Learning Specialization by University of Alberta on Coursera

=== Roadmap ===

1. Start with Deep Learning Specialization to build a strong foundation.
2. Progress to Natural Language Processing Specialization to specialize in NLP.
3. Advance to Reinforcement Learning Specialization to dive into advanced AI concepts.

🚀 AI Career Copilot

1. Start with Deep Learning Specialization to build a strong foundation.
2. Progress to Natural Language Processing Specialization to specialize in NLP.
3. Advance to Reinforcement Learning Specialization to dive into advanced AI concepts.

=== Daily Plan ===

- 1-2 hours: Complete lectures and assignments
- 1-2 hours: Work on coding exercises and projects

=== Reasoning ===

- The courses selected cater to your intermediate level and interest in AI.
- These courses are highly rated and taught by experts in the field.

Enhancements:

- FREE course suggestion: "Machine Learning" by Stanford University on Coursera
- Real-world project idea: Develop a chatbot using NLP techniques
- Tools to use: Python, TensorFlow, PyTorch

I hope this career path helps you in achieving your goal of becoming an AI Engineer. Let me know if you need any more assistance!
